BUSINESS ANALYSIS & Insights

Section 02

From Sales to Customer Value

Analysis Framework

Business Overview

How is the
business
performing?

Sales Performance

Where is
revenue coming
from?

Demand & Operations

What drives
demand &
efficiency?

Customer Experience

Does delivery
affect
satisfaction?

Deep Insights
& Customer
Value

Which
customers drive
higher value?

Business Overview

Total Revenue

5.13M

Total Orders

7k

Total Customer

6.415k

Returning Customer

6.415k

Sales Performance

① Where Is Revenue Coming From?

Category

Identify top-performing product categories driving the most revenue

Branch / Region

Compare performance across Egypt, UAE, and KSA

Order Source

Evaluate in-store vs. online channel contributions

Membership Status

Assess how loyalty tiers impact total revenue

Customer Experience

① How do customers interact with B.Laban?

Delivery Speed

Analyze order fulfillment and delivery wait times to optimize dispatch efficiency during peak demand

Customer Rate

Track average rating scores and feedback across branches to monitor overall service quality.

Time vs. Rate

Evaluate how delivery and preparation duration directly impact customer satisfaction and review scores.

Loyalty & Retention

Assess repeat order rates and customer retention through active participation in membership programs.

Average of Store_Rating
by Delivery_Time_Min

Demand & operations

① What drives customer demand?

Peak hours drive the highest order volumes — staffing and inventory should align with demand curves

Temperature influences product category preferences and overall quantity ordered

External conditions (weather, time of day) are key demand signals for planning

Business Purpose: Use demand patterns to support inventory and staffing decisions.

03

RECOMMENDATIONS

Section Three

From Analysis to Action

From Insights to Actions

01

Peak demand periods identified → Optimize staffing and inventory scheduling.

02

Strong-performing category drives revenue → Focus inventory and marketing on top products.

03

Delivery performance signals detected → Review and streamline the delivery process.

04

Members show higher business value → Strengthen loyalty programs to retain top customers.
